

ASI Internet Services, a division of MicroTech Services, Inc. is proud to announce the Third product in our new Professional Series of products and services. Available as a sellable product or as a yearly subscription, ASI Internet Services is able to routinely scan over 10 million messages a day without bogging down your email servers. It also filters out viruses at the same time. We invite you to learn more about why corporations world-wide have made the reliable and maintenance-free Barracuda Spam Firewall the most trusted solution for spam-blocking.

There is no dispute that email has become a key communications tool for corporations. However, with spammers quickly filling your company's inboxes with unwanted messages, email has become a less efficient means of communicating. In fact, according to predictions by industry analysts, a third of your inbox will be spam by the end of the year, if it isn't already.

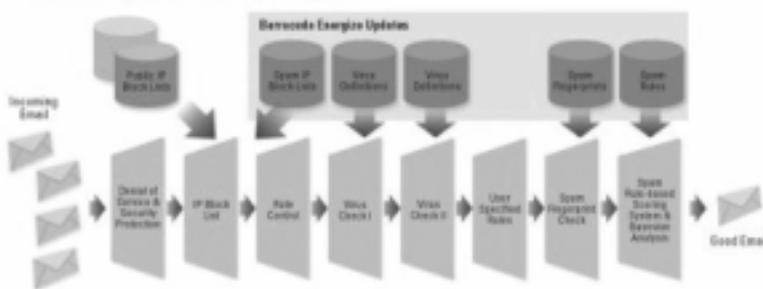

It's now time to take control and put an end to spam. Ensure your company's email can remain a safe and effective way for communicating.

Just see what some of the leading industry review magazines are saying about this new product.

Barracuda Spam Firewall Defense Layers

"Spam accounts for 45% of all e-mails, or 15 billion messages every day, and costs business world-wide a total of \$20 billion a year in lost productivity and technology expenses, according to the Radicati Group, a market research firm in Palo Alto, CA. The firm predicts the number of daily spams will rise to more than 50 billion by 2007, and costs will reach almost \$200 billion per year."

—Wall Street Journal, August 2003
