

A Division of MicroTech Services, Inc.

Professional Series

ASI Internet Services, a division of MicroTech Services, Inc. is proud to announce the First product in our new Professional Series of products and services. Providing small and medium sized business with nearly 100% of the services they would demand on a daily basis the Net Integrator is easily managed, secure, and flexible. Just add an Internet circuit from ASI Internet Services or other carrier to complete the new small business of the future.

Net Integrator Mark I is truly an integrated office super server. Tailored for businesses, offices, departments and schools requiring superb performance and advanced features, Net Integrator Mark I offers the power and flexibility of traditional servers at an unbeatable price. Versatile yet extremely easy to operate, Net Integrator Mark I requires no network administration skills for management. Advanced disaster recovery features integrated into Net Integrator Mark I, are especially suited for departments and offices that cannot tolerate long periods of down time.

Just see what some of the leading industry review magazines are saying about this now product.
